INTERNSHIP

Lovely Professional University *Jan'26 – Present*
Assistant Software Developer

- Developed and maintained full-stack applications using Python, React.js, and Node.js, focusing on performance, scalability, and clean architecture.
- Built backend services and REST APIs in Python and Node.js to handle data processing, authentication, and business logic.
- Designed responsive and interactive user interfaces with React, ensuring smooth user experience.
- Integrated frontend and backend systems, handled API communication, and optimized data flow between services.

Celebal Technologies *May'25 – Jul'25*
Data Science Intern

- Applied exploratory data analysis (EDA) and visualization to derive insights from datasets.
- Performed data preprocessing, cleaning, and feature engineering to improve model performance.
- Implemented supervised ML algorithms (Regression, Classification) to solve business problems.
- Worked on machine learning models for prediction tasks using regression techniques (Linear, Logistic, etc.).

CybroXide Technologies *Oct' 24 – Apr' 25*
Data Science Intern

- Cleaned and transformed raw datasets using Python and SQL, improving data quality and model accuracy.
- Conducted exploratory data analysis (EDA) to uncover trends, anomalies, and key business insights.
- Created interactive dashboards using Tableau and Power BI to visualize KPIs and performance metrics.
- Collaborated with data engineers to optimize ETL processes and improve data pipeline efficiency.
- Analyzed customer behavior data to support segmentation and targeting strategies using clustering algorithms.

PROJECTS

LPU Convocation Page | *Django, React.js, PostgreSQL* *Dec'25*

- **Project link:** https://findmyphoto.lpu.in/
- Designed and developed a full-stack convocation web application to allow students to access and download their convocation ceremony photographs captured at degree-awarding time.
- Implemented a photo retrieval system that maps student records with ceremony-time images using unique identifiers (e.g., registration number / roll number).
- Developed Django REST APIs to handle photo storage, retrieval, and student data verification.
- Designed an optimized PostgreSQL database schema to manage student details, convocation events, and associated images.

Face Recognition Web Application| *Django, Python, OpenCV, Face Recognition, SQLite* Aug' 25

- **Project link:** https://github.com/shivang027/chitraseek.git
- Integrated face recognition library to extract and compare facial encodings for matching uploaded images with stored student records
- Configured Django Admin for managing students and viewing face encodings.
- Designed and implemented database models (Student, Contact) with fields like Reg_No, Name, Program, Batch, Section, Hostel, and Image.

Personal Portfolio | React.js, Node.js Feb' 25

- **Project link:** https://github.com/shivang027/portfolio.git
- Developed a responsive and visually appealing personal portfolio website using React.js and Node.js, effectively showcasing my projects, technical skills, and professional achievements.
- Designed a user-friendly layout with smooth navigation, optimized for both desktop and mobile devices to enhance the user experience and accessibility.
- Highlighted key tasks, accomplishments, and performance metrics through detailed project descriptions and real-time demonstrations, offering a clear insight into my capabilities and experience.
